

# Junior Quality Control Manager

## Vicenza, Italy

We are recruiting one **Junior Quality Control Manager** for Vicenza. The position will report to the Project Manager responsible for the Area.

### Your responsibilities

- Operatively manage the construction site with the objective of performing quality control of work performed by subcontractors, coordinate work with the Client, assist in scheduling of work
- Perform quality control activities, including preparation of appropriate checklists (preparatory, initial and follow-up)
- Prepare and manage submittals of materials based on data provided by subcontractors or extracted from project specifications;
- Prepare Quality Plans

### Your mandatory requirements

- Technical engineering degree (minimum 3 years) required (Mechanical/Electrical)
- At least 3 years of experience in design firms with focus on MEP systems or construction (infrastructure and/or building) in similar role
- Fluent English both spoken and written
- Good knowledge of technical drawing and computer aids necessary to manage and edit technical drawings (AutoCAD)

### Additional qualifications that would be an advantage:

- Minimum experience as Quality Manager in structured construction companies or in design firms focused on MEP systems
- Experience with a General Contractor on projects where a Project Quality Management System is implemented and required (Oil&Gas or Pharmaceutical industry, Government Agencies, International Construction Projects)
- USACE Contractor Quality Management (CQM) Training

### Soft skills in order of importance

- Accuracy and reliability
- Determination, problem-solving skills, ability to work in a team and by objectives
- Communication skills

We are looking for your online job application.
